

SO YOU WANT TO SPAY YOUR CAT?

YOU HAVE
QUESTIONS

&

WE HAVE
ANSWERS

#1

WHEN SHOULD I SPAY?

Cats should be at *least 5 months of age* before we consider them a good candidate for spay.

#2

HOW MUCH
WILL IT
COST?

Standard spay

• \$ 201.35* •

* Spay fee is higher if patient is pregnant.

What does this include?
The base price includes a pre-surgical exam, general anesthesia, the surgical procedure, post-operative therapeutic laser, and appropriate pain medications.

PREANESTHETIC
BLOODWORK

Ensures that all vital organ systems are healthy enough to undergo anesthesia! We also offer FeLV/FIV testing

\$176

CATHETER AND IV
FLUIDS

Provides intravenous access in case of emergency, and allows us to provide IV fluids to keep your kitty hydrated throughout surgery.

\$86

LASER PACKAGE

CO2 laser that allows for less bleeding, and faster healing times

\$56

MICROCHIP

Includes implantation and registration in the case that your pet gets lost!

\$78

What else
do we
recommend?

Preparing for the Big Day

What to do!

- DO plan on dropping on between 7:45-8:30 am the morning of the procedure
- DO allow 10-15 minutes for a technician to review the consent form
- DO plan on picking up the day of the procedure between 4:30 - 6 pm
- DO allow 10-15 minutes to review the discharge instructions

- DO NOT feed anything after 10 pm the night before the procedure
- DO NOT withhold water overnight
- DO NOT allow any running, jumping or playing while the incision is healing (10-14 days)
- DO NOT allow your kitty to lick at their incision!

What not to do!

SCHEDULING CONFLICT?

Don't worry
about it!

Ask us about dropping off the night before or picking up the morning after surgery.

IMPORTANT POINT!
If you think your pet might need an e-collar, let us know!
